SAMPLE DELIVERABLE

Board Presentation Pack

A high impact board style package that turns complex program issues into a clear executive storyline, risks, decision requests, roadmap, and governance view.

CLIENT PRIVACY

Client names and identifying details are anonymized.

DELIVERABLE TYPE

Board ready slides, executive narrative, decision asks, risk view, and roadmap.

TYPICAL BUYER

Executives, board sponsors, CIOs, CTOs, transformation leaders, and advisory teams.

SITUATION

The board needed a sharp storyline, not a status dump.

Multiple workstreams had progress, risk, and decision needs. The leadership team needed a concise board ready story with clear asks and visual evidence.

PRESENTATION ISSUE

Inputs were detailed but not shaped into an executive story.

DECISION RISK

Board time could be spent on background instead of the decisions needed.

BOARD READINESS

The package provides a clean story, visual risk view, and specific decision requests.

CORE SLIDES

12

Board ready storyline with speaker logic.

DECISION ASKS

4

Clear approvals or direction needed.

RISK THEMES

8

Grouped for executive action.

ROADMAP HORIZON

90

Day action view for follow up.

Use a decision led structure: context, why now, options, risks, recommendation, and requested board direction.

Board narrative structure.

Each slide has one message, one purpose, and one intended executive takeaway.

SLIDE	MESSAGE	VISUAL TREATMENT	DECISION VALUE
1	Why this matters now.	Executive headline with urgency drivers.	Frames the conversation.
2	Current state is creating decision drag.	Pain point map with operating impacts.	Shows business relevance.
3	Program progress is uneven by workstream.	Heatmap across scope, people, process, data, tech.	Focuses governance attention.
4	The largest risk is not technology, it is unclear ownership.	Risk stack with ownership gaps.	Shifts discussion to accountable action.
5	Three options are available.	Option comparison with value and feasibility.	Creates executive choice.
6	Recommended path balances speed and control.	Recommendation card with rationale.	Supports approval.
7	Dependencies determine delivery confidence.	Dependency network with critical path.	Shows what must be resolved.
8	Financial view is staged by decision gate.	Investment bands and benefit timing.	Reduces funding ambiguity.
9	Change readiness needs active sponsorship.	Adoption risk map.	Clarifies leadership role.
10	90 day plan is actionable.	Roadmap with milestones.	Shows momentum.
11	Governance decisions are required.	Decision log and owner view.	Enables direction.
12	Board ask is specific.	Four requested decisions.	Closes with clarity.

How this creates value

- Reduces executive noise.
- Creates a decision led narrative.
- Makes risks visible without overloading the board.
- Gives leaders a usable follow up roadmap.

What this prevents

- Slide decks that read like status reports.
- Unclear asks at the end of the meeting.
- Hidden dependencies.
- Over detailed material that slows board decisions.

Sample board slide snapshots.

The pack uses visual slide patterns that help leaders scan, decide, and remember the message.

SLIDE 03

Program Readiness Heatmap

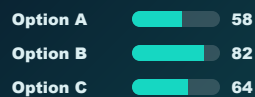

Scope is strong. Ownership, adoption, and data readiness need active attention.

SLIDE 05

Option Decision View

Targeted improvement is the best balance of value, cost, and risk.

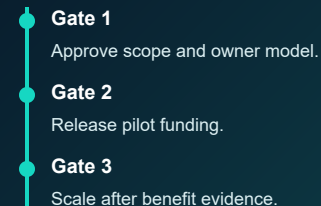

VISUAL	PURPOSE	WHY IT WORKS
Heatmap	Shows uneven readiness quickly.	Executives can see where attention is needed.
Option cards	Compares choices.	Avoids debate without criteria.
Roadmap	Shows time phased action.	Links approval to next steps.
Decision log	Names the ask.	Prevents vague meeting outcomes.

SLIDE 08

Investment Timing

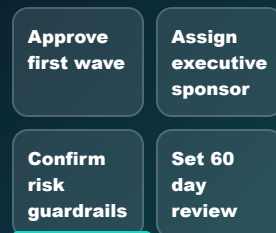

Funding is staged against milestones and decision gates.

SLIDE 12

Board Decision Ask

Approve first wave, assign sponsor, confirm guardrails, and set review date.

The best board materials do not try to show everything. They show the right things in the right order.

Board pack quality controls.

The deck is checked for executive clarity, decision logic, and evidence discipline.

CONTROL	QUESTION	RISK REDUCED	ACTION
Message test	Can the slide headline stand alone?	Weak narrative	Use action headline.
Decision test	Does the deck ask for a clear decision?	No outcome	Add decision page.
Evidence test	Is every key claim supported?	Credibility risk	Add source note.
Length test	Can it be reviewed within board time?	Overload	Move detail to appendix.
Risk test	Are risks grouped by decision relevance?	Unfocused concern	Use risk themes.
Follow up test	Does the roadmap name owners?	No execution path	Add owner view.

Storyline

- Why now
- What changed
- What decision

Evidence

- Facts
- Risks
- Options

Action

- Decision ask
- Owner
- Timeline

Board preparation roadmap.

STEP 1

Shape story

- Clarify audience
- Confirm decision ask
- Build storyline

STEP 2

Build visuals

- Create heatmap
- Summarize options
- Design roadmap

STEP 3

Validate

- Check evidence
- Review risks
- Test flow

STEP 4

Finalize

- Prepare speaker notes
- Package appendix
- Confirm next steps

Decision log

DECISION	RECOMMENDATION	STATUS
Board ask	Approve first wave and governance model.	Approve
Sponsor	Assign named executive sponsor.	Required
Risk review	Review high risks monthly.	Control
Next meeting	Set progress checkpoint.	Schedule

Open questions

- What is the single decision the board must make?
- Which details belong in appendix?
- Which risks require board direction?
- What happens immediately after approval?

The package turns complex program material into a board ready story with clear decisions and follow through.
